PREP & COOKING

Each layer of biscuits is packed on an ovenable, disposable tray. Place this tray onto a sheet pan for easy handling. Preheat convection oven to 325 degrees. If using a conventional oven, preheat to 375 degrees. Place sheet pan into oven. Allow biscuits to heat for 7 to 8 minutes from a thawed state, or 10 to 12 minutes from frozen. (See case for specific microwave heating times). Carefully remove sheet pan from oven and brush biscuit tops with melted butter or margarine, if desired. Transfer biscuits to a serving plate or basket. To keep remaining biscuits warm, place the entire sheet pan into a warming drawer, set at 50% moisture and 160 degrees.
